Summary

Senior Data & BI Professional with 6+ years of experience transforming how organisations access, trust, and act on their data. Specialised in delivering end-to-end analytics solutions from KPI frameworks and executive dashboards to data warehouse architecture and cloud pipelines with a consistent focus on accuracy, performance, and business impact.

Key Skills

• Business Intelligence • Data Warehousing • Data Modeling • Data Governance • Data Quality & Validation • KPI Frameworks • Dashboard Development • Root Cause Analysis • BI Modernization • Cloud Data Engineering • Predictive Analytics • Stakeholder Management • Requirement Gathering • Executive Reporting • Agile / Scrum

Technical Skills

BI & Visualization: Power BI (DAX, Power Query), Tableau, KPI Scorecards, Self-Service Reporting, Executive Dashboards

Data Warehousing & Databases: SQL (Oracle, SQL Server, PostgreSQL), Data Modeling, Star Schema, Snowflake Schema, Dimensional Modeling, Metadata Management

Cloud Platforms: Microsoft Azure (Data Lake, Databricks, ADLS Gen2), Amazon AWS (S3, Glue, Lambda, Athena, Redshift), Microsoft Fabric

Data Engineering: PySpark, Delta Lake, ETL/ELT Pipelines, Medallion Architecture (Bronze/Silver/Gold)

Languages & AI: Python (Pandas, NumPy, BeautifulSoup, Scikit-learn, Matplotlib), R (Basic), Claude Code, Copilot

DevOps & Collaboration: JIRA, Confluence, Azure DevOps, Git, Github, Agile/Scrum, UAT, Six Sigma Yellow Belt

Professional Experience

Independent Data Analytics Consultant

Dublin, Ireland / Remote | Oct 2023 – Present

Hospitality Client — Customer Insights & Retention Analytics

Current | Python, SQL, Excel, Power BI

- Scraped and consolidated customer feedback data from web sources using BeautifulSoup and Python; built a clean, structured dataset tracking satisfaction scores, NPS, and retention patterns across customer segments
- Analysed feedback trends and experience gaps using SQL and Python; identified key drivers of dissatisfaction and seasonal booking behaviour, delivering prioritised recommendations to the client
- Built a Power BI dashboard surfacing retention rates, satisfaction scores, and sentiment insights **customer satisfaction response rate improved from 68% to 85%** following implementation of data-driven experience changes, directly contributing to increased seasonal bookings

Metaverse Transaction Risk & Fraud Detection

Python, Machine Learning, SQL

- Investigated fraud patterns across 78K+ financial transactions; applied SMOTE for class imbalance, PCA for dimensionality reduction, and cross-validated Logistic Regression, Random Forest, KNN, and Naive Bayes models
- Selected Naive Bayes as the final model based on generalisation analysis **achieved ~94.6% F1-score** on unseen data and delivered a reusable, production-ready fraud detection pipeline

Vendor Performance Analytics

Python, SQL, Power BI, Tableau

- Designed a SQL-driven KPI framework analysing delivery, quality, and cost metrics across vendors; flagged variances exceeding 15% thresholds and surfaced underperforming suppliers previously undetected in existing reporting
- Built interactive Power BI and Tableau dashboards enabling self-service reporting **reduced time spent on manual vendor reviews** and enabled procurement teams to act on data independently

ShopVista E-Commerce Data Pipeline

Azure Databricks, Delta Lake, PySpark, Power BI

- Built an end-to-end ELT pipeline on Azure Databricks using Medallion Architecture (Bronze → Silver → Gold); ingested data from ADLS Gen2 and applied deduplication, type casting, and business rule corrections across dimension and fact tables
- Delivered a Power BI dashboard **tracking \$22.19B in sales, 1.6M units, and 299.7K customers across 7 countries** with a 66.53% repeat customer rate surfaced through Gold-layer KPI aggregations

- Analysed 1,000+ Amazon sales records across three cities using SQL; identified top-performing product lines, seasonal revenue trends, customer demographics, and branch-level performance variations
- Delivered insights on customer type, gender distribution, and VAT impact **providing actionable recommendations to refine sales strategy, improve inventory decisions, and personalise customer targeting**

MSc Business Analytics — Dublin Business School

Dublin, Ireland | 2023 – 2024

Completed full-time MSc in Business Analytics while maintaining hands-on expertise across cloud, BI, and ML platforms.

Infosys — Client: Goldman Sachs

Hyderabad, IN | Mar 2021 – Sep 2023

Data Consultant (Official Designation: Technology Analyst) | Goldman Sachs FICC & GLP

Data analysis, KPI reporting, risk monitoring, and data quality governance in a regulated financial environment.

- Gathered business requirements and translated them into Power BI dashboards using DAX, Power Query, SQL, Oracle, and SQL Server **improving reporting efficiency by 30%** and enhancing executive decision-making
- Designed KPI frameworks and self-service reporting solutions across multiple business functions; reducing manual reporting effort and improving stakeholder visibility into operational performance
- Examined batch log and SLA breach patterns via self-built SQL dashboards; identified feed sequencing as root cause of ~15 monthly incidents and drove a fix that **reduced incidents to 2–3 low-severity per month**
- Performed data profiling, validation, and root-cause analysis across enterprise pipelines **preventing data-quality breaches on P&L-critical financial pipelines** in a regulated Azure environment
- Examined Gold-layer data flows with BI and QA teams; identified pipeline misalignments and recommended fixes that **improved report delivery efficiency by 25%**
- Introduced structured delivery tracking via JIRA and Azure DevOps achieving **consistent on-time delivery** and reducing knowledge-transfer gaps across cross-functional teams

iConcept Software Services — Client: Bayer Crop Science

Hyderabad, IN | Feb 2019 – Mar 2021

Data & BI Analyst (Official Designation: Technical Support Engineer)

- Gathered reporting requirements and delivered SQL-backed Tableau and Power BI dashboards; providing self-service KPI visibility and **reducing stakeholder dependency on ad-hoc data requests**
- Investigated Azure VM performance and data-ingestion trends; identified seasonal capacity gaps and **delivered data-backed recommendations that reduced infrastructure over-provisioning costs**
- Restructured KPI presentation ahead of CEO review **earned direct CEO recognition** for analytical clarity and decision-support quality
- Detected recurring data-quality issues before they reached reporting layers **improving downstream dashboard reliability** and reducing manual correction effort
- Traced UAT defects to data-layer inconsistencies; improved release stability and **ensured production reporting accuracy** across enterprise application deployments
- Analysed support issue patterns and identified resolution bottlenecks **reducing average resolution time by ~20%** through structured tracking tools

Knoah Solutions — Client: Time Warner

Hyderabad, IN | Oct 2016 – 2018

Associate

- Built Excel-based trackers and field-tracker tools to analyse support trends **improved resolution time by ~20%** and standardised issue management across the team
- Earned **two Bravo Awards** for outstanding client service and analytical contribution

Certifications

- | | |
|---|--|
| • Google Data Analytics Professional Certificate | • Microsoft Power BI Data Analysis |
| • HackerRank SQL Certified — Basic, Intermediate & Advanced | • Infosys certified in Cloud Computing |
| • IBM AI Fundamentals | • Six Sigma Yellow Belt |

Education

Dublin Business School

Dublin, Ireland | 2023 – 2024

Master of Science (MSc) — Business Analytics

Sree Dattha Institute of Engineering and Science (JNTU)

Hyderabad, IN | 2012 – 2016

Bachelor of Technology (B.Tech) — Electronics & Communication Engineering
